

# Does my project fit the Discretionary Grants Program?

The lists below are meant to present some guidelines as to the projects we seek to fund through our Discretionary Grants program, but they do not list every type of project we would or would not consider funding.

We encourage potential applicants to review these lists and then reach out to the Discretionary Grants program lead to discuss their project before beginning an LOI.

## Likely Fit

- Collaborative Planning that involves more than one organization
- Strategic planning processes including facilitation costs, planning costs, etc.
- Long-term brand and service awareness development such as websites, reports, etc.
- Piloting new projects related to work/programs your organization is currently providing
- Policy research and/or analysis
- Minor equipment purchases that cost less than \$10,000 and expand access to those facing the greatest barriers to care
- Service expansion or activities with lasting potential to improve health care delivery, coverage, or quality

## Unlikely Fit

- Media ad buys
- Curriculum development
- Public awareness campaigns

## Not a Fit

- Grants/Scholarships for individuals or paying for direct care/services for individuals
- Bridge or gap funding (funding that keeps a program going until more funding is found), seed funding, matching funding, or partial funding for large projects
- Capital expenditures/fundraising/donations/general upkeep or repair costs of buildings, landscape, etc.
- General operating support (funding to support day-to-day operations of the work an organization is designed to do)
- Funding for academic or graduate research
- Supplemental costs for already existing programs (staffing, fringe, etc.)
